

Serpentshrine Caverns Trash Guide

Coilfang Beast-Tamer:

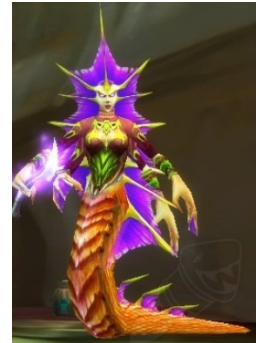

Cleave: Deals Physical damage to all those **in front**, face it **away** from the raid.

Bestial Wrath: Enrages self and two **Sporebats**. Always kill **Beast-Tamer first**.

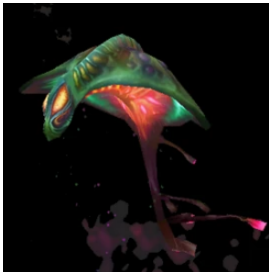

Coilfang Hate-Screamer:

Sonic Scream: Target player receives **5,000-6,000 Arcane Damage** heal through it.

Silence: Silences targets in a huge **Area of Effect** around the **Hate-Screamer**. Stun or remain ranged to avoid.

Serpentshrine Sporebat:

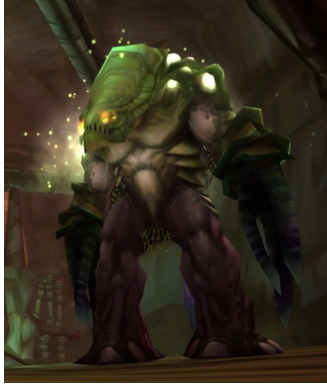

Charge: Stuns, dashes, and strikes any target within **1 to 30 yards**. This ability cannot be 'dead-zoned'. This can charge **anyone in range**.

Spore Burst: Initial **1300-1600 Nature Damage** and applies a **DoT** of **694-806 Nature Damage**.

Strategy:

1. Polymorph or Hibernate on **Sporebats** and **Hate-Screamers**.
2. **Main Tank** picks up **Beast Tamers** while the **Off Tank** picks up the remaining mobs that are not **crowd controlled**. All **Ranged DPS** and **Healers** remain **Maximum Distance**.
3. **Raid DPS** kill order is **Beast Tamers → Sporebats → Hate-Screamers** keeping them **Crowd Controlled** as long as possible.

Underbog Colossi: There are **THREE** variants of these, half the battle is identification:

A) Initial Infection: Disease that deals heavy **nature damage**. **Cleanse immediately.**

Sporequake: Channeled shake that deals constant **nature damage**. **Entire Raid must move out.**

B) Serpenshrine Parasite: Applies debuff on a random target deals **2000 Nature Damage**; a **Serpentshrine Parasite** will spawn. **Kill it.**

Acid Geyser: Channeled ability at random player; **target of this** must **MOVE** to **turn the Colossus around**. **Ranged DPS** and **Healers** are expected to be at **Close** range during these fights.

C) Frenzy: Enrages the **Colossus**, attack speed **greatly increases**. **Healers** must compensate and keep **Tanks** alive.

Atrophic Blow: Targets hit have their **Strength** and **Stamina** reduced. **Tanks** must compensate.

After Death: **Colossi** also have a few triggers after they die; **Toxic Pool** deals damage, **Summons Adds** need to be killed, and **Refreshing Mist** provides a healing effect.

Strategy:

1. **Identify** the current **Underbog Colossi** you are fighting.
2. **A) Cleanse** the raid of any **Initial Infections** as well as direct the raid to **move out** of **Sporequake**.

B) Instruct raiders to **call out Parasites** for **Ranged DPS** to kill. **Acid Geyser Target** calls out and must **turn the boss around** or **away from the raid**.

C) Healers keep an eye on the tank for **Frenzy's** activation for damage spikes. **Kill** as normal.

Vashj'ir Honor Guard

Enrage: Increases attack damage and attack speed

Frightening Shout: Fears all raiders in melee range.

Knockback: Kicks targets back **7-10 yards**.

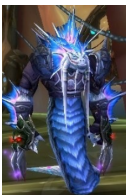

Mortal Cleave: Mortal Strike to all targets hit. **Reduces Healing**.

Coilfang Priestess:

Holy Smite: Deals **3150-3850 Holy Damage** to the target.

Holy Fire: Deals **3755-4250 Holy Damage** applies **magic DoT**.

Priestess Spirit: Spirit Healer spawns and spams **Holy Nova** upon death healing **allies** and damaging **enemies**.

Coilfang Shatterer:

Shatter Armor: Reduces armor by **50%** for **15 Seconds** and reduces damage dealt by **35%** on the **Main Tank**

Greyheart Technician:

Hamstring: Applies a **66% Slow** to the target.

Strategy:

1. **Main Tank** and **Off Tank** pull the pack together. **Move enemies** and call for **raiders** to get out of **Holy Nova** from **Coilfang Priestesses**
2. **Ranged** and **Melee DPS** cleave down targets, **Area of Effect** spells are very effective. **Shamans** use **Tremor Totem**.

Greyheart Tidecaller:

Water Elemental Totem: Summons a **water elemental**. **Raid members** should quickly kill the totem. Do **NOT** target the elemental.

Poison Shield: Deals heavy nature damage upon being struck. **MUST** be **PURGED** immediately to avoid heavy raid damage.

Virulent Poison: Nature **DoT** that can be dispelled.

Greyheart Nether-Mage:

Spells: *Frostbolt, Fireball, Cone of Cold, Rain of Fire, Arcane Volley, Blink, Scorch*
[All function as **player** spells]

Destruction Buffs: Frost/Fire/Arcane: Gives a heavy damage bonus to the chosen damage type. Can be **purged** or **spell-stolen** by a **Mage**.

Greyheart Skulker:

Kick: Kicks the target and interrupts spellcasting, do not cast while in melee with a Skulker.

Strategy:

1. **Main Tank** and **Off Tank** pull the pack together.
2. **Ranged** and **Melee DPS** kill all **Water Elemental Totems** as soon as they spawn. **Shamans** and **Priests** purge **Poison Shield** from **Tidecallers**.
3. **Healers** will **Dispel** all poisons. **Raiders** kick **Channeled Spells** cast by the **Nether-Mage**.
4. Kill order is **Tidecallers** → **Nether-Mages** → **Skulkers**

Coilfang Serpentguard:

Spell Reflection: Reflects all spells cast for a short duration.

Corrupt Devotion Aura: Reduces the armor of all nearby **raiders**.

Coilfang Fathom-Witch:

Domination: **Mind Control** a player for 10 seconds. **Crowd Control** the target.

Shadow Bolt: Instant cast, deals heavy shadow damage to the target.

Shadow Nova: Damages and knocks back all nearby players; may drop them below. Position carefully.

Serpentshrine Lurker:

Poison Bolt Volley: Deals nature damage and poisons the target with a DoT.

Shadow Bolt: Instant cast, heavy shadow damage spell.

Rancid Mushroom Primer: Summons large amounts of mushrooms that grow over time. Players must move away from them.

Strategy:

1. **Main Tank** and **Off Tank** pick up and position the melee to not be **Knocked Off** by **Shadow Nova**.
2. **Move** and **Avoid** Mushrooms from **Rancid Mushroom Primer**. **Shamans** use **Grounding Totem** to eat the **Mind Control**. **Crowd Control** any targets that become **Mind Controlled** by **Fathom-Witches**.
3. Kill order is **Lurkers** → **Fathom-Witches** → **Coilfang Serpentguard**

Tidewalker Murlocs:

While possessing many diverse abilities, these murlocs do not pose a significant threat to the raid if pulled correctly. They do have **Shamans** that **Chain Lightning**, **Depth-Seers** that cast **Healing Touch**, and **Hydromancers** that can **Frost Nova**. The strategy remains the same.

Strategy:

1. **Main Tank** and **Off Tank** pull the murlocs together.
2. **Ranged** and **Melee DPS** cleave down targets, **Area of Effect** spells are very effective.
